

Profile

Senior Full Stack Engineer with 6+ years building **high-throughput systems**, **developer tools**, and **AI-powered applications**. Experienced in designing infrastructure that handling massive workloads, building production-grade compute platforms with modern AI inference tooling, and creating delightful user experiences that developers love. Passionate about **developer productivity**, Svelte, and building tools that abstract complexity.

Employment

Senior Full Stack Engineer	Spring.new	May 2025 – Present
----------------------------	------------	--------------------

- Architected a novel **LLM tool call execution** widgets UI using **Cerebras**, **Google Vertex AI**, and **QuickJS**, providing real-time visualizations of LLM tool calls.
- Built the company's **in-house database solution** with automatic snapshots, restore capabilities, import/export, and **Redis-powered realtime events**—enabling users to persist data without managing infrastructure.
- Created the entire **automated E2E testing platform** using **Playwright** and **GitHub Actions**, with continuous execution across staging and production environments.
- Deployed **event-driven microservices on AWS** using **SST**, **Bun**, and **Effect.ts** for type-safe, resilient serverless workflows.
- Owned the end-to-end **user onboarding experience** with **React**, **Framer Motion**, and **Tailwind**, optimized for conversion and accessibility.

Senior Full Stack Engineer	Cymbio	Oct 2023 – May 2025
----------------------------	--------	---------------------

- Architected an external communication **audit service** (NestJS, MongoDB, AWS) capturing **300K+ records/hour**, improving platform observability and giving our internal support teams better tooling.
- Led the development of a customer-facing **analytics dashboard** providing customers with full visibility into their orders, sales metrics, and operational data—improving customer self-service.
- Partnered with DevOps and infra teams to optimize CI/CD, reducing build times of our main monolith **from 15 to 4 minutes** and significantly improving deployment velocity.
- Added **anomaly detection and alerting** with NewRelic, Prometheus, and **OpenTelemetry**.
- Delivered **technical workshops** to the R&D team of 30+ engineers on topics including observability systems, JS runtimes, and development velocity.

Full Stack Engineer	CityHive	May 2021 – Oct 2023
---------------------	----------	---------------------

- Built a **microservices architecture on Cloudflare Workers** handling **25M+ requests/day** with 99.95% uptime, consolidating two legacy Node.js backends.
- Led development of a customer-facing **CMS editor** (TypeScript, Grapes.js, Ruby on Rails) used by **3,000+ businesses**, enabling non-technical users to design their own storefronts.
- Built and launched an **Add-ons Marketplace** that increased ARR by \$300K+ annually and enabled third-party developer integrations.
- Designed **backend APIs** supporting third-party integrations in close collaboration with product and engineering teams.

Projects & Open Source

- **Songsterr Downloader** — Built the world's most popular website for obtaining Guitar Pro files; scaled to **500K+ daily users**, ranked #1 on Google, and generated recurring revenue. SvelteKit, Vercel
- **Skeleton.dev Contributor** — Early contributor to the most popular Svelte UI component library.
- **RizzGPT** - Created an all in one dating automation platform with SvelteKit and Gemini.
- **Open Tunings** — A community driven app for discovering open tunings on the guitar. SvelteKit
